

EAGLE

FLEX CLOTH ROLL

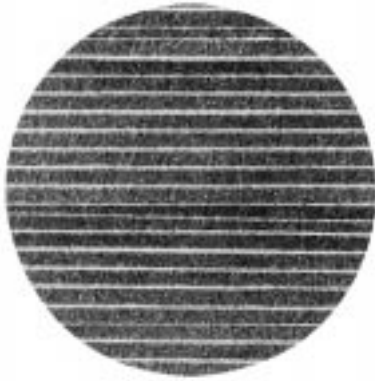

solves your sanding problem on difficult-to-sand surfaces.

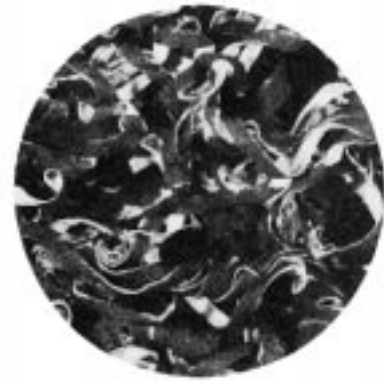

FLEX CLOTH ROLL

solves your sanding problem on difficult-to-sand surfaces.

Before use

During use

APPLICATIONS

Auto-body Repairing	For scratching the between coat of door-pulls, roof drips, the back of bonnets, front grills and another concave surfaces or difficult-to-sand surfaces of automobile bodies
Wooden Products	Curved or engraved surfaces, plain or painted surfaces of all the wooden products such as furnitures, fittings, musical instruments, etc.
Do-it-yourself	Descaling and paint-removing of galvanized iron sheets and fences
Others	Good substitute for steel wool and non-woven abrasive clothes

USAGE

Pull the roll out of its center, cut off an adequate length for a handful (about 5 portions) and crumple it into a wad before use.

Dip the wad into water. The more it is crumpled and twisted, the better it cuts.

CHARACTERISTICS

1. Long use makes the roll more flexible and each slit more twisted for better contact on curved surfaces.
2. Used portions can be re-used by putting several sheets one over another.
3. Can be used for both dry and wet sanding.

PRODUCTION PROGRAM

Size	75mmx15meters (3"x49')				100mmx15meters (4"x49')				
Grits	#1000	#800	#600	#400	#360	#320	#280	#240	#180
