

EAGLE FIBRE SANDING DISCS

Cuts fast, lasts long; Eagle Fibre Sanding Discs provide top quality and the best value.

Coated with select premium abrasive minerals, these fibre sanding discs are excellent for MIG weld grinding, paint removal, metalwork, and can even cut through rust and plastic fillers with ease. Discs are all resin-bonded for outstanding cutting speed and have an open coat for load resistance and cooler sanding . Choose the Aluminum Oxide disc for the best value, while the Premium Zirconium disc is recommended for the most demanding grinding and finishing applications.

Achieving quality through consistency.
Manufactured by Kovax Corporation, Japan

EAGLE FIBRE SANDING DISCS

Premium Zirconium Disc

Aluminum Oxide Disc

CHARACTERISTICS

- All resin bonded for excellent cutting speed and durability.
- Open coated discs allow cooler sanding and outstanding load resistance.
- Longer disc life results in less frequent disc change overs, and increases productivity.

ADVANTAGES

- Superior cutting power with sharp abrasive minerals promote fast and efficient grinding.
- Discs have the ability to attack all kinds of grinding and finishing applications quickly and easily.
- Effectively cuts through rust, welded, and plastic fillers.

USAGE

- Door skinning, MIG weld grinding.
- Paint removal and metal work.
- Sanding and grinding all kinds of surfaces quickly and effectively.
